PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

09/314,052

Applicant(s)

OTT ET AL.

Examiner

Manuel Mendez

Art Unit

3763

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/03/2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 82-87 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 82-87 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Comment

After a complete review of this application and related applications, the examiner respectfully requests applicant to present arguments explaining how the pending claims overcome the cited references used in the following rejections.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 82-87 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Bartels et al. (U.S. 4,621,632) in view of Bell (6,039,696), and in further view of Ott et al. (5,411,474)**. Bartels et al. teaches a method and apparatus of providing for a period of time, heated and humidified gas into a patient by directing a gas from a source to a chamber, humidifying the gas within the chamber with liquid, replenishing the liquid, heating the gas, filtering the gas, sensing the temperature, controlling the electrical power, wherein the step of heating and humidifying performed on the gas is simultaneous, with the chamber adjacent to the patient. Bartels teaches all of the limitations of the claims except for explicitly reciting a humidity sensing means and a monitoring means connected to the humidity sensing means for monitoring the humidity of the gas and keeping it within a determined threshold. Bell teaches a humidity sensing

Art Unit: 3763

means and a monitoring means for monitoring the humidity of the gas and keeping it within a determined threshold. It would have been obvious to one of ordinary skill in the art, at the time of invention to have modified the humidity device of Bartels et al. to monitor humidity by a humidity sensing means as taught by Bell while keeping the humidity within a determined range or threshold for the well known purpose of preventing a cavity that is normally moist from drying out thereby causing inflammation causing discomfort such as the respiratory system or otherwise. Please note that the Examiner considers a recharge signal as being any signal generated by the humidity sensor to indicate the device is low on humidity.

Concerning the step of filtering the gas, Bartels et al. and Bell teach all of the limitations of the claims except for filtering the gas prior to the step of humidifying. Ott et al. teaches that "It is known to filter insufflation gas" to prevent passing of inorganic molecules. He further states, "The location and type of filter, however, are very important factors which will influence the effectiveness of the method." It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to have modified the insufflation device taught by the combination of Bartels et al. and Bell with the placement of a filter as taught by the insufflation device of Ott et al. for the purpose of preventing inorganic molecules from reaching the respiratory system.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 571-272-4962. The examiner can normally be reached on 0730-1800 hrs.

Art Unit: 3763

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Nicholas D. Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

A handwritten signature in black ink, appearing to read 'Manuel Mendez', is positioned above the printed name.
